

What are we doing?

We are about to start a £1 million investment programme to improve the electricity supply to Malton.

We are laying two new High Voltage cables, in parallel through the town and installing two new substations.

What our investment will achieve:

New HV cable

New substations

Enhanced power network

Meet the team

Ian Cannon
Programme Manager

Ian is responsible for delivering Capital Investment for our region.

Andy Moverley
Project Delivery Engineer

Andy is responsible for ensuring the day-to-day running and safe delivery of this project.

Amanda White
Customer Service Manager

Amanda is your dedicated customer manager and is ready to respond to any enquiries from the local community. Call 07714 076 484 Monday to Friday (8am to 5pm) or 0800 011 3332.

Investing in North Yorkshire

At Northern Powergrid our teams work 24/7 to manage the network that powers everyday life for 8 million customers across the North East, Yorkshire and northern Lincolnshire.

In our North Yorkshire Region we deliver electricity to 439,000 homes and businesses.

At Northern Powergrid we understand the role that a safe and reliable power network has in supporting communities and local businesses. Therefore it is important that the network is robust and supports the electricity demands in Malton. That is why we are investing to reinforce our existing network to enable future growth and expansion.

As part of our investment we are replacing 6km of underground cables and installing two new substations which will keep Malton powered for years to come. The new cabling will help meet future increases in demand for power as the town develops and more customers invest in electric vehicles, solar panels and heat pumps.

Overleaf you will find an overview of where we will be working. This work is being delivered by our contractor, O'Connor Utilities and will involve us excavating in the road to install the new cabling. In order to carry out this excavation work safely we will be using traffic management at all stages of the work so there

may be some traffic disruption, we will do all we can to minimise the impact of this.

We are working closely with North Yorkshire County Council to ensure this work causes as little disruption as possible and we are committed to keeping local people informed by letters, local media and social media.

We are not planning to turn anyone's power off during these works and it's unlikely we will need access to premises. We will also make sure we maintain pedestrian access to premises and that businesses can make arrangements to continue to receive their deliveries.

We would like to thank you in advance for your patience while we carry out this important investment work to improve your local power network.

Mike H

Mike Hammond
General Manager, North Yorkshire Region

The essential investment work in Malton will start on 2 June 2021 and is expected to last around 15 weeks

The work we plan to carry out will be delivered by our specialist contractor **O'Connor Utilities** with assistance from our own local workforce.

We will write to our customers who are directly affected by the works. In the meantime, thank you for your patience while we carry out this essential investment work to improve your local power network.

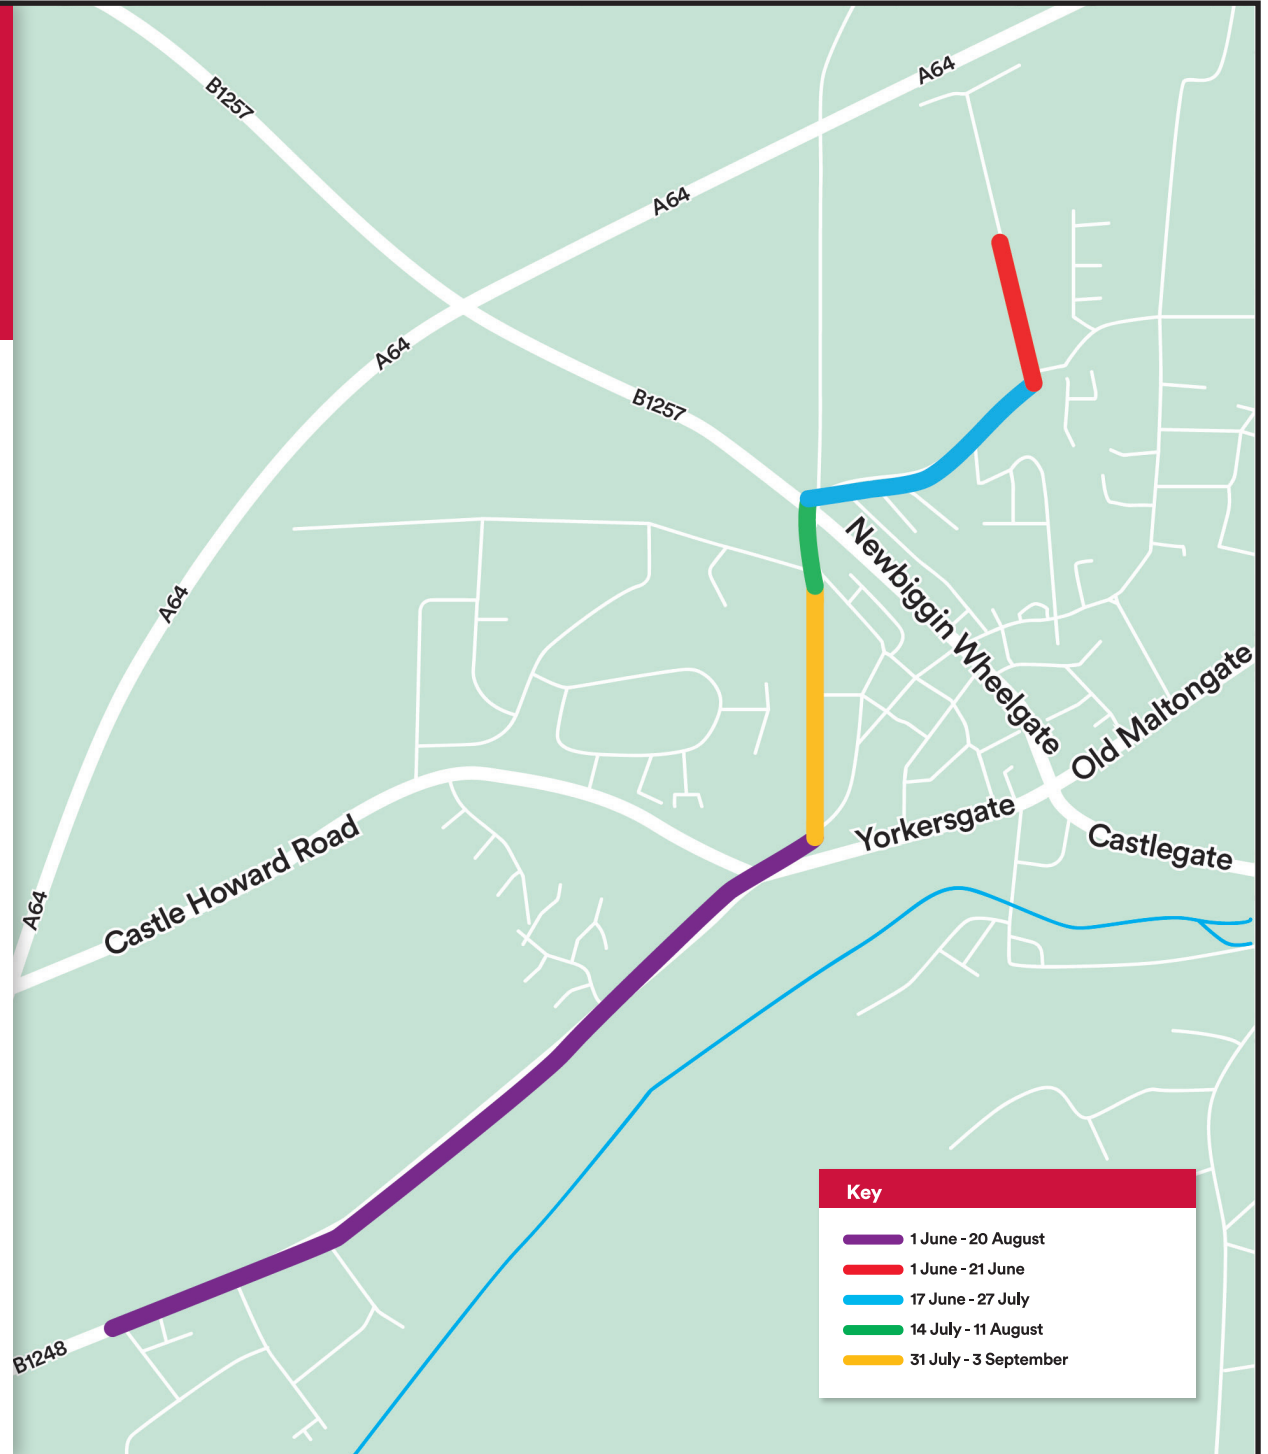

If you are medically dependant on electricity and would benefit from joining our free Priority Services Membership visit [northernpowergrid.com/care](https://www.northernpowergrid.com/care) or call **0800 169 2996**.

If you need any further information about this planned investment work in your local community, please call our 24-hour contact centre team on **0800 011 3332** or email generalenquiries@northernpowergrid.com and we will be happy to help.
