# READY TO POWER YOUR CAREER?

The energy sector is going through exciting changes as we work to create a smarter, greener energy system and support the UK's ambition to meet net zero emissions.

Would you like to be part of the team that powers everyday life for 8 million people across the North East, Yorkshire and northern Lincolnshire and manages the electricity network that connects communities, enables economies and is key to the growth of low carbon technologies such as electric vehicles, heat pumps and solar panels?

## SUPPORTING YOU

We power diverse communities across the region and we want to have a strong team that can help us meet the different needs of our customers. Whatever your background or skills, you can be assured of new and exciting career opportunities at Northern Powergrid.

We'll support your development through our excellent training framework, ensure you have the skills to work safely on our network and provide opportunities for you to reach your full potential and energise your career.

With operational sites and offices across the North East, Yorkshire and northern Lincolnshire, you'll be part of our team and contribute to our vision to be the best energy company in serving our customers while delivering sustainable energy solutions.

Find out about your potential career opportunities, required qualifications and our professional training programmes at [northernpowergrid.com](https://www.northernpowergrid.com)

**2 YEAR  
Programme**

### Power Engineer Apprentice (Graduate Trainees & Technical Trainees)

If you're dedicated and passionate about becoming a highly skilled engineer, we'd like to hear from you.

Our power engineer apprentice programmes will give you the training and skills to begin an exciting career. You'll gain professional experience, complete relevant projects and training, and develop and apply your academic knowledge. We'll help you become a well-rounded engineer with a successful track record of courses, placements and experience behind you so you can be placed in your permanent role in Northern Powergrid.

**3 YEAR  
Programme**

### Power Engineer Apprentice (Foundation Degree)

Our foundation degree programme will equip you with the skills you need to begin an exciting career.

We'll fund your academic studies, and our flexible approach means you'll have the opportunity to work anywhere from the Scottish Borders to northern Lincolnshire. In addition to your studies, you'll have the opportunity to visit factories that build and supply our equipment, including pivotal items such as transformers, cables and switchgear. Our programme has been designed to give you a broad picture of Northern Powergrid and the skills, qualifications and experience to be a first-class engineer.

**3 YEAR  
Programme**

### Craftsperson Apprentice

Do you thrive outdoors, love working with your hands and want to be an integral part of a skilled team?

We're looking for practical individuals who'd like to be trained in the specialist skills needed to work safely and competently on our electricity network in a variety of roles. You'll gain professional experience, complete training courses, study for recognised qualifications at college, and all whilst receiving a salary from the day you start your career with us. If you're interested in earning while you learn, we can help energise your career.
